

— IMPORTANT! —

The LCD Contrast must be adjusted when installing the following PC Boards:
RPI Part #'s MIA147, MID148 and MIB149.

CAUTION: This adjustment must be made with the power turned ON. Dangerous voltages may be exposed on the main PC Board. Be careful not to short terminals together if using a metal adjustment tool.

To adjust the LCD Contrast, turn the small flat head screw to the right for brighter contrast, and to the left for darker.

MIA147LBL Rev A (01/21)
