RPI Part #RPT501

DOUBLE-ENDED SPANNER WRENCH

Redesigned with Remountable Spanner Nuts!

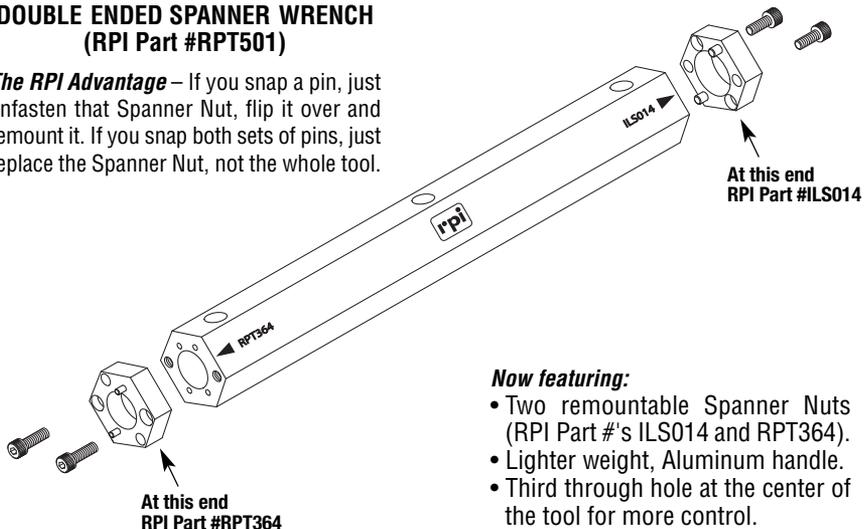

We have redesigned our Double Ended Spanner Wrench (RPI Part #RPT501) to include two Spanner Nuts (RPI Part #'s ILS014 and RPT364) creating one spectacular tool!

The Double Ended Spanner Wrench (RPI Part #RPT501) now features:

- Remountable Spanner Nuts (RPI Part #'s ILS014 and RPT364). So, if you snap a pin, you can unfasten that end, flip it over and remount it to the wrench with a new set of pins ready to go. Or if you happen to snap both sets of pins, just replace the Spanner Nuts and the Wrench is ready to go again.
- Aluminum handle with stainless steel Spanner Nuts to lower the weight of the tool.
- A third through hole at the center of the wrench for more control.

REDESIGNED DOUBLE ENDED SPANNER WRENCH (RPI Part #RPT501)

The RPI Advantage – If you snap a pin, just unfasten that Spanner Nut, flip it over and remount it. If you snap both sets of pins, just replace the Spanner Nut, not the whole tool.

Now featuring:

- Two remountable Spanner Nuts (RPI Part #'s ILS014 and RPT364).
- Lighter weight, Aluminum handle.
- Third through hole at the center of the tool for more control.
