

Join our Team!

A Healthcare Components Group Company

We Are Hiring!

Replacement Parts Industries (RPI) is seeking an experienced Biomedical Equipment Technician who is interested in developing new replacement parts with our Product Development Team.

The responsibilities of this position include the identification, reverse engineering, and development of new parts as well as providing our customers with technical support.

This is a great opportunity to apply your knowledge and experience to a new position, reverse engineering medical parts of all kinds, and helping your fellow biomedical engineers through technical support.

Includes potential for some travel and representing RPI at industry functions including trade shows and conferences.

Qualifications

- Minimum 5 years working on a variety of hospital equipment required, as well as military biomed training or Associates Degree in biomedical equipment electronics/repair.
- Experience working on sterilizers is helpful, but we are seeking an individual who has worked on a variety of healthcare equipment who can lead us into supporting new lines of equipment.
- Enthusiasm in learning and taking on new challenges is a must, as are excellent customer service/interpersonal skills. Personable on the phone.
- Knowledge of using Word and Excel programs.
- Bilingual English and Spanish is a plus but not required.

Salary and Benefits

Competitive salary and benefits, including medical, dental, and 401k.
